### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greenberg in view of Debski, along with Zakrzewski.

Greenberg discloses in figures 1 an exercising jacket that substantially anticipates a device for massaging comprising a garment 10, a plurality of interior pockets (28, 30), a plurality of pockets (32, 34, 36 and 38), located on the back of the garment and a storage compartment 24. However, Greenberg does not disclose a plurality of horizontal compartments located on the back of the garment, the chambers being formed by layers joined to one another with a plurality of parallel seams. Debski teaches in figure 2 an exercising vest comprising a plurality of horizontal compartment 17 that are formed of layers (12, 13) and separated by parallel seams 15. The compartments are located from the top to the bottom of the back of the garment. The garment is a vest. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the horizontal compartment extending from the top to the bottom of the back of the garment as taught by Debski could be substituted for the compartments in the back of the garment disclosed by Greenberg in order to be able to have massage devices in compartments that extend along the entire

length of the user's back. The compartments would be made of two layers and separated by parallel seams as taught by Debski. Although applicant has not claimed the compartment open, they could be open as taught by Zakrzewski.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Irvin discloses an exercising vest.
